

Arlanda 2012-04-17.

Spirit Security Information

New regulations” known shipper concept” valid from April 27 2012.

Change will take place in two steps.

- 1. 2012-04-27: Shipper who wants to be accepted as known shipper must take contact with one of Transportstyrelsen appointed Validation Company. Validation will take place at shipper’s location. Result will be sent to Transportstyrelsen whom decide if shipper will be accepted as known shipper or not.**
- 2. From 2013-04-29: all known shippers must have been approved by Transportstyrelsen.**

What impact will this new regulation have on terminal handling?

It’s almost impossible to say but we believe that 20% of all shippers are sending 80% of all goods. We also believe that these 20% are going to be known shippers.

There will be more unsecure goods to screen. We will do our best to avoid extended handling time for unsecure export shipments.

Spirit will closely follow up on how the new regulation will have impact on our handling and quality.
